Deliverable 2.2.B: Final Report on the Mediterranean Sea Reconstruction/Reanalysis Web Portal

WP Coordinator:
Claudia Fratianni
INGV, Bologna

Authors
Claudia Fratianni

I Abstract

This Deliverable wants to give details on the last development of the NEXTDATA geoportal on Mediterranean Sea Reconstruction/Reanalysis (RR), currently running on INGV infrastructures at the following web address: <http://medsearr.bo.ingv.it/>.

II Documentation Tab

At the end of the activities of the WP2.2, a specific Web Portal dedicated to Mediterranean Sea Reconstruction/Reanalysis (RR), was developed.

Following the user requirements and the discussions had during the Project development, the RR geoportal has been constructed and implemented on the INGV server. The geoportal provides network services compliant with the INSPIRE directive and the exposed dataset can be interrogated, displayed and downloaded, including information on metadata.

The final version of the geoportal has been enriched with a new tab, indicated as "Documentation" (**Figure 1**) and added to the Main Menu, to allow the users downloading all useful information on the available products.

Under the documentation tab, a document containing a description of the system, the validation framework and the validation results can be found (**Figure 2**).
